Webinar on Resilient Woman Leadership and skill Development

RKDF Media News

The impactful "Webinar on Resilient Woman Leadership and Skill Development" illuminated the virtual realm from November 22nd to 27th, 2021. Esteemed keynote speakers, Ms. Preeti Khare, Ms. Vidya Mahajan, and Ms. Sujata Mukharji, graced the event with their expertise, collectively steering the discourse towards empowered leadership and skill augmentation.

Ms. Preeti Khare, a beacon of inspiration, delved into the intricate tapestry of "Women Empowerment and Leadership." Her insights unveiled the

transformative potential of resilient leadership, fostering a paradigm shift in understanding and approach.

In her session, Ms. Vidya Mahajan's focus on "Empowering Women through Skill Development" struck a resonant chord. Her discourse highlighted the vital role of skill enhancement in paving the path for women's empowerment, creating a ripple effect of positive change.

Ms. Sujata Mukharji's topic, "Increasing Employment Amongst Women," emerged as a clarion call for societal transformation. Her profound insights illuminated strategies to elevate women's participation in the workforce, igniting hope for inclusive growth.

The webinar synergized diverse perspectives, cultivating an environment of profound learning and empowerment. As the virtual curtains fell, participants departed with enriched perspectives and fortified ambitions. The "Webinar on Resilient Woman Leadership and Skill Development," enriched by the wisdom of Ms. Preeti Khare, Ms. Vidya Mahajan, and Ms. Sujata Mukharji, reverberates as a cornerstone in the journey towards fostering empowered women leaders and igniting a collective wave of positive change.

Collaborative Awareness and Competence Enhancement in Agricultural and Managerial Domains

Cooperative Awareness and Skill Development converged harmoniously in the dynamic domains of Agriculture and Management on the significant date of December 17th, 2020. The distinguished presence of Dr. Amit Mudgal, our esteemed Chief Guest, illuminated the event with his profound expertise.

The event served as a crucible for knowledge exchange and synergistic growth. Participants from diverse backgrounds embarked on a journey of enlightenment, delving into the intricacies of modern Agriculture and Management. Dr. Amit Mudgal's insights were a beacon of inspiration, enriching the discourse with his extensive experience.

In the realm of Agriculture, sustainable practices, technological advancements, and the intricate interplay of factors were illuminated, fostering a deeper understanding of this vital field. Simultaneously, the arena of Management was explored, unraveling the tapestry of effective leadership, strategic decision-making, and resource optimization.

The event's tapestry wove together threads of collaborative learning and skill enhancement. As participants departed, they carried forth a renewed sense of awareness and competence, poised to contribute positively to their respective spheres. The Cooperative Awareness and Skill Development event, graced by Dr. Amit Mudgal's expertise, resonated as a pivotal step towards holistic growth and innovation in Agriculture and Management.

PDP on Cryptography and Cyber Forensic Security

RKDF Media News

Cryptography and Cyber Forensic Security are pivotal in today's digital world. Chief guest AIG Mr. Vaibhav Shrivastava speaking on the occasion. Cryptography involves securing data through encryption, safeguarding sensitive information during transmission. It's crucial for online banking, e-commerce, and secure communication.

Cyber Forensic Security focuses on investigating cybercrimes. Experts collect and analyze digital evidence to identify culprits and prevent future breaches. This field is indispensable in today's cyber-

threat landscape.

The synergy between these fields is evident. Cryptography shields data, while Cyber Forensic Security comes into play when breaches occur, tracing back to the source.

In conclusion, Cryptography and Cyber Forensic Security are the guardians of the digital realm. They protect data, privacy, and the integrity of online transactions. Understanding their importance is essential for businesses and individuals in our interconnected world.

Short training FDP on 21st Century Agriculture Education, RKDF University

RKDF Media News

In the 21st century, agriculture education has undergone a remarkable transformation to meet the evolving demands of a world facing unprecedented challenges. It's no longer solely about traditional farming methods; it has evolved into a dynamic, multifaceted discipline that embraces innovation, sustainability, and global awareness.

Today's agriculture education encompasses a broad spectrum of knowledge and skills. It integrates cutting-edge technologies such as precision farming, artificial intelligence, and biotechnology, equipping students with the tools to maximize yields while

minimizing environmental impact.

Furthermore, it emphasizes sustainability. Students learn about eco-friendly practices like organic farming, permaculture, and conservation agriculture. They're taught to balance productivity with environmental stewardship, ensuring a resilient and healthy food supply for future generations.

Agriculture education in the 21st century extends beyond the farm. It includes agribusiness management, supply chain logistics, and policy advocacy. Graduates are not just farmers; they are agri-entrepreneurs, researchers, policymakers, and global food system leaders.

In conclusion, 21st-century agriculture education is a driving force in shaping the future of sustainable agriculture. It empowers individuals with the knowledge and skills needed to address global food security, environmental sustainability, and economic prosperity on a rapidly changing planet.

PDP on "Resilient Women Leadership Development"

RKDF Media News

Dt. 22-11-2021

In today's ever-changing world, resilient women leadership development has emerged as a powerful force driving positive change. It's a dynamic process that empowers women to thrive in leadership roles, overcome adversity, and make a lasting impact on society.

Resilient women leaders possess a unique set of qualities. They are adaptable, confident, and unafraid to confront challenges head-on. Through mentorship, education, and empowerment programs, women are equipped with the skills and mindset necessary to excel in leadership positions.

This development is not just about personal growth; it's about fostering diversity and inclusivity in all sectors. Resilient women leaders bring fresh perspectives, innovative solutions, and empathetic leadership styles to the table, enriching organizations and communities.

Moreover, resilient women leadership development emphasizes resilience in the face of adversity. Women learn to turn setbacks into stepping stones, transforming challenges into opportunities for growth.

In conclusion, resilient women leadership development is a catalyst for positive change. It cultivates empowered, confident, and adaptable leaders who not only shatter glass ceilings but also uplift others on their journey. It's a beacon of hope and progress, lighting the way for a more inclusive and equitable future.

The "Workshop on Biogas Plant" encapsulates a journey into the realm of sustainable energy generation, illuminating the path towards a greener and more self-reliant future. This enlightening event is a testament to the significance of harnessing renewable resources to meet our energy needs.

At the heart of this workshop lies the exploration of biogas, a versatile and eco-friendly energy source derived from organic waste. Participants delve deep into the science behind biogas production, understanding the intricate microbial processes that transform waste into a valuable energy commodity.

Led by experts in the field, the workshop offers a hands-on experience, guiding attendees through the design, construction, and operation of biogas plants. From feedstock selection to monitoring gas production, participants gain practical insights that enable them to establish their own sustainable energy systems.

In a world grappling with the consequences of fossil fuel dependency, the "Workshop on Biogas Plant" stands as a beacon of hope and innovation. It empowers individuals to become active contributors to a sustainable and resilient future, where renewable resources hold the key to both energy security and environmental preservation. As participants embark on their biogas journey, they join a growing movement that seeks to reshape our energy landscape for generations to come.

Workshop Programme

Event: Machine Learning

Date: 13/6/22-17/6/22

Expert Speaker – Dr Ritesh Sadiwala, Professor & Mr Ranjit Nikose, Assistant Professor

Objective: To understand the various types of machine learning, its applications, and to develop a model for classification and regression.

Summary: FDP on Machine Learning provides a clear overview of Machine Learning topics such as supervised learning, unsupervised learning, reinforcement learning, and deep learning. The two-week FDP on machine learning aims to introduce the fundamentals of machine learning software. Several practical assignments will be given to the participants. Overall, the FDP is a great platform for faculty and researchers. The Machine Learning workshop covered the various fundamental and widely used Deep Learning technologies and their applications, further on language processing, thus, paving the way for a solid foundation of Machine Learning.

Machine Learning Course Outline:

- Introduction to Machine Learning
- Find out where Machine Learning is applied in Technology and Science.
- Introduction to supervised learning.
- Types of supervised learning
- Introduction to regression, single linear regression, multiple linear regression. Explanation of classification, tree-based classification.
- Implementing a decision tree using scikit-learn.
- Introduction to probabilistic classifiers: Bayes, understanding Naive Bayes.
- Types of unsupervised learning
- Identify the difference between unsupervised learning and supervised learning.
- Working with Deep Learning with neural networks.

The complete workshop begins with the simple and basic concepts of the technology and progressively increases the difficulty level. There was enough for everyone to learn. The complete FDP can be taken as a step towards AI for all faculties. Greater discussion in brief about different software required for ML programming. Moreover, the complete workshop was a fresh experience for faculty, this certainly the experience and certificate earned through the faculty will help them.

R.K.D.F. UNIVERSITY, BHOPAL

Outcome:

Knowledge Enhancement: Faculty learns about new concepts and software, and certainly it enhances their domain specific knowledge.

Innovation and Skill Development: The FDP introduces novel concepts to the faculty. These novel concepts can be utilized in innovative application by the faculty.
